

MERN Stack Training

Company: Sensation Software Solutions

Student Name: Tajinder Kaur

Training Duration: 6 Months

Days: 35

Objective of the Day

The objective of Day 35 was to **finalize the To-Do List project**, apply validations, and understand best practices.

Work Done on Day 35

The trainer helped us:

- Add input validations
- Improve UI structure
- Handle API errors
- Optimize code

We also tested the application thoroughly.

Project Finalization

Features completed:

- Full CRUD operations
 - API integration
 - Redux state management
 - User-friendly UI
-

Learning Outcomes

- Complete understanding of a React CRUD project
 - Experience with Redux and APIs
 - Confidence in building real-world applications
-

Conclusion

Day 35 marked the **successful completion of the To-Do List project**. This project helped connect all React concepts learned during training and provided real industrial-level experience.
