

## **MERN Stack Training**

**Company:** Sensation Software Solutions

**Student Name:** Tajinder Kaur

**Training Duration:** 6 Months

**Days:** 90

---

### **Objective of the Day**

The objective of **Day 90** was to implement **Delete Task functionality**, optimize performance, and perform a complete project review.

---

### **Delete Task Feature**

A confirmation modal was added to prevent accidental deletions. Backend DELETE API was integrated successfully.

---

### **UI & Performance Optimization**

- Improved UI consistency
  - Enhanced error handling
  - Optimized image loading
  - Reviewed backend validations
- 

### **Final Project Review**

The entire project was reviewed including:

- Backend APIs
  - File uploads
  - Frontend UI
  - CRUD workflows
- 

## Learning Outcome

- End-to-end full-stack experience
  - Real-world project understanding
  - Production-ready application flow
- 

## Conclusion

Day 90 marked the **successful completion of the Student Task Tracker project**, providing strong hands-on experience in full-stack development aligned with industry standards.
