

## MERN Stack Training

**Company:** Sensation Software Solutions  
**Student Name:** Tajinder Kaur  
**Training Duration:** 6 Months  
**Days:** 32

---

## Objective of the Day

The objective of Day 32 was to implement **Update and Delete operations** in the To-Do List application.

---

## Work Done on Day 32

The trainer explained how to:

- Edit existing tasks
  - Delete tasks from database
  - Refresh UI after updates
- 

## Update and Delete Logic

### Example:

```
const deleteTask = async (id) => {
  await axios.delete(`/deleteTask/${id}`);
  fetchTasks();
};
```

---

## Hands-on Practice

We implemented:

- Edit button for tasks
  - Delete functionality
  - Confirmation before delete
- 

## Conclusion

Day 32 completed the **CRUD cycle** and made the To-Do List application fully functional.
